Wells
HYGIENE SYSTEMS | FOOD SAFETY

ABOUT WELLS

When you choose Wells, you're investing in the most effective risk management program and products to protect your customers and your business.

For more than 80 years Wells has supplied the highest quality products to the food processing, manufacturing, healthcare and dairy industries.

From our humble beginnings as a family business, we have now become the market leading supplier of hygiene and food safety products in Australia and New Zealand.

Wells are the exclusive importers of the Vikan Hygiene System® and associated cleaning and food handling tools, a name synonymous with colour coded cleaning equipment.

We also supply many other products which are manufactured by Vikan subsidiaries, including Nito washdown products, Vikan ErgoClean® microfibre cleaning systems and the amazing Vikan vehicle/ transport cleaning range.

Wells were the first in Australia to introduce the BST Detectable Products range. This greatly enhances the food safety offerings and helps our customers manage the risk of foreign object contamination in the food processing and manufacturing environment.

With a focus on Lean Manufacturing, GMP and continuous improvement, Wells can also assist companies large and small with their 5S program with an extensive array of custom signage and storage systems.

When you choose Wells, you're buying more than hygiene and food safety products, you're investing in the most effective risk management program, backed by Wells' highly experienced staff.

"To us it's more than just products, it's about helping you achieve best practice in your workplace."

OUR SPECIALIST PARTNERS

Based in Denmark, Vikan manufactures the most comprehensive system in the world created for manual cleaning and food handling.

ADVANCING HYGIENIC CLEANING

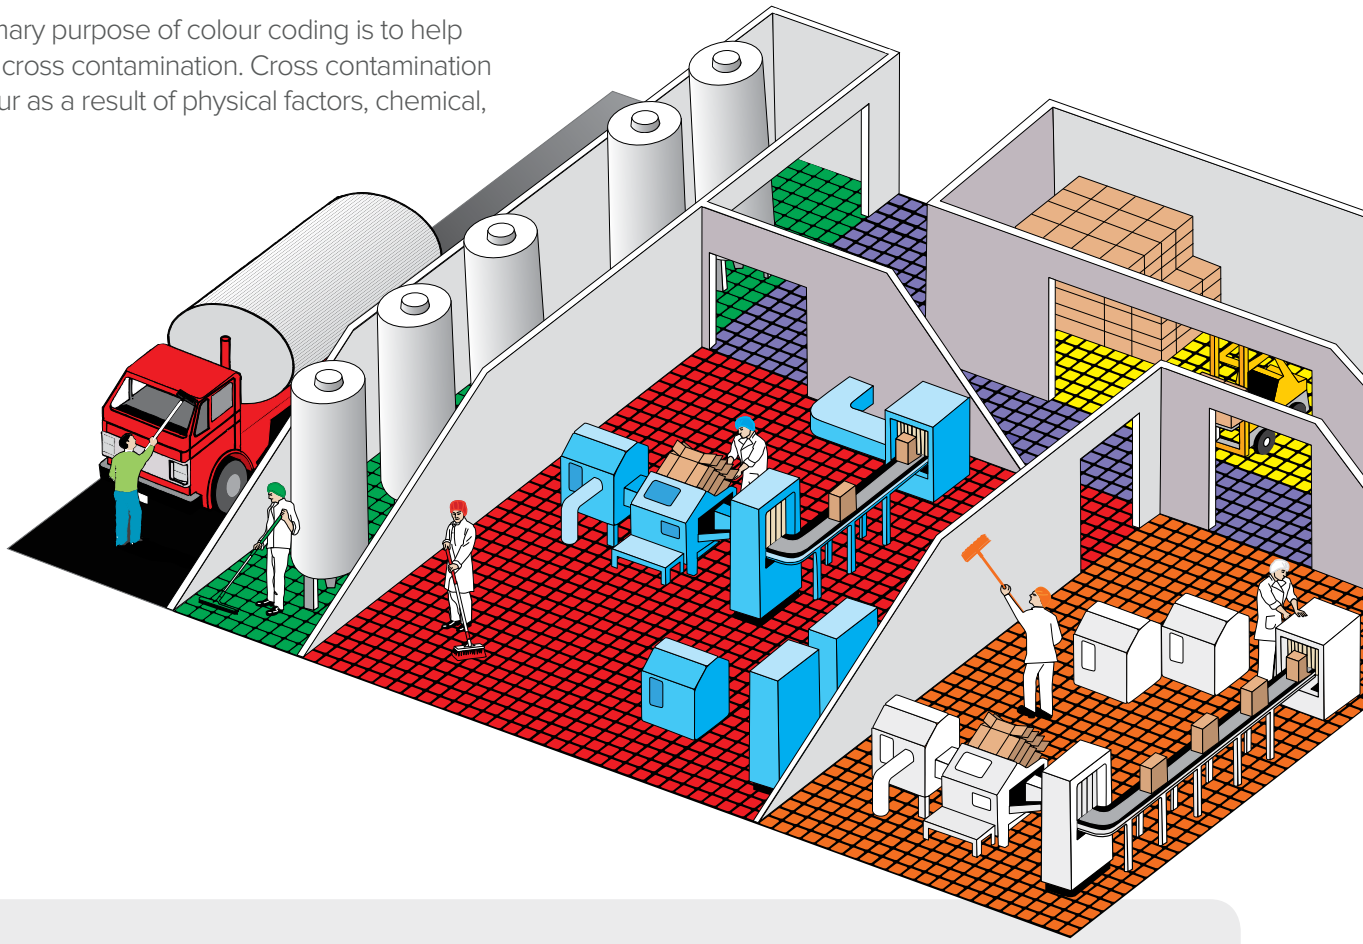
COLOUR CODING

Vikan were the first & are the world leader in colour coded hygiene systems, offering the most comprehensive product and colour range available.

Vikan and Wells were the first to introduce colour coded hygiene and food handling equipment to the Australian food manufacturing and processing industry.

The primary purpose of colour coding is to help prevent cross contamination. Cross contamination can occur as a result of physical factors, chemical, microbes and allergens, amongst many others. Most Vikan products are available in up to nine colours to enable your cross contamination management program.



More products,
more colours,
and better designed
than anyone else.

Implement colour coding at your facility...

Speak with our experienced food safety professionals about implementing a colour coding and foreign object risk management program, call 03 9699 8999 (AUS) or 09 263 9332 (NZ).

PRODUCT GUIDE

When placing an order please note the product code and colour option (if applicable) to ensure we fulfil your order correctly. The example below demonstrates how our coding system works. If you require more information about a product please speak with your sales consultant or call our office on 03 9699 8999 (Australia) or 09 263 9332 (New Zealand).

Just add colour...

Simply add your desired colour code to the product code to confirm the exact product required.

VIKAN FACT

The Vikan company is 90% owned by a charitable foundation called the Vissing Foundation. Profits are used and largely donated for medical research and healthcare, ongoing product development and research related to hygiene and the environment. Just another great reason to choose Vikan.

1

VIKAN HYGIENE SYSTEM

All of Vikan's food-industry specific 'high hygiene' tools are made of EU approved and FDA compliant materials and can be washed at high temperatures to eliminate germs and bacteria. All equipment is durable, ergonomic and fully moulded to guarantee easy cleaning and is available in up to nine colours.

BROOMS

Broom Selection Guide

Bristle:	Extra Stiff	Soft/Stiff Combo	Medium	Soft/Split	(UST) Ultra Safe Technology
Notes:	Helps move large stubborn soil from rough floor surfaces. Can be used in wet or dry cleaning.	The 'All Rounder' for medium and small soils. Used most effectively in 'push' motion. Can use in wet or dry cleaning.	Used for finer particles and soils on smoother floor surfaces. Mainly used in dry cleaning.	Mechanically split bristle ends are excellent on powders and dry cleaning applications.	The ultimate for critical care cleaning applications, dry or wet. ** Fully moulded brushware. See Pg 56 for more on UST brushware*

Floor Brooms - Large

PRODUCT CARE

Always remember to hang up your broom after use on a good quality wall bracket system. Then wash, rinse, sanitise and air dry at the end of the day. You can also use hot water to straighten the bristles and extend the life of your broom.

PRODUCT ADVICE

Having problems cleaning powder or inside ribbon blenders?

Try the Vikan Angle Adjustable Brush 28/7067+ and 1500mm One Piece Handle 28/2962+.

Complimentary and obligation free, cost effective solutions for your workplace.

Wells and our authorised distributors can help you identify current and potential hygiene risks at your workplace and provide suitable cost effective solutions.

Our experienced team and network of trained distributors are available to visit your workplace to assess your workplace hygiene, cleaning and 5S systems. This service is complimentary and obligation free.

This initially consists of a comprehensive workplace survey where we assess and document the condition and accessibility of your cleaning tools and equipment. Once complete we provide a list of recommendations aimed at improving your workplace hygiene and reduce the potential for cross-contamination, along with a lean or 5S structure around hygiene & colour coding.

Our complimentary and obligation free workplace hygiene review consists of the following:

- Cleaning Equipment & Tools
- Equipment Storage & Identification Systems
- Area Colour Coding Practices
- Staff Training Requirements
- Equipment assessment visits at agreed intervals
- Potential risks for foreign objects

To book a free site survey, call Australia on 03 9699 8999, or New Zealand on 09 263 9332.

Floor Drain Removal Hook

Drain hook designed to fit grates on top of channel floor drains. The grate can then be easily and ergonomically lifted exposing drain base for cleaning.

- Reduces bending
- Avoids dirty hands
- Aids effective drain cleaning

HYGIENIC DESIGN

The ultra hygienic fully moulded single bladed hand squeegee removes all water and soils, and features a soft flexible blade which is easy to keep completely clean.

Excessive condensation becomes droplets that contaminate your product.

By placing the squeegee blade against the ceiling or pipe and pulling towards you, the condensation will not only be removed from the surface but also collected safely in the condensation bottle or drained away through the telescopic handle with draining hole.

HAND BRUSHES

VIKAN EDGE DESIGN

Feels Better. Looks Better. Cleans Better.

The new Vikan 'Edge' designed brushware is evidence of Vikan's ongoing investment in research and development. Not only does it look and feel better, it also cleans better than ever before.

Better ergonomics with the asymmetric curved design fitting hands large and small.

No negative angles or externally angled brush stocks which minimises areas where bacteria and soils can accumulate.

Multi-functional usage design and angled brush filaments for improved efficiency.

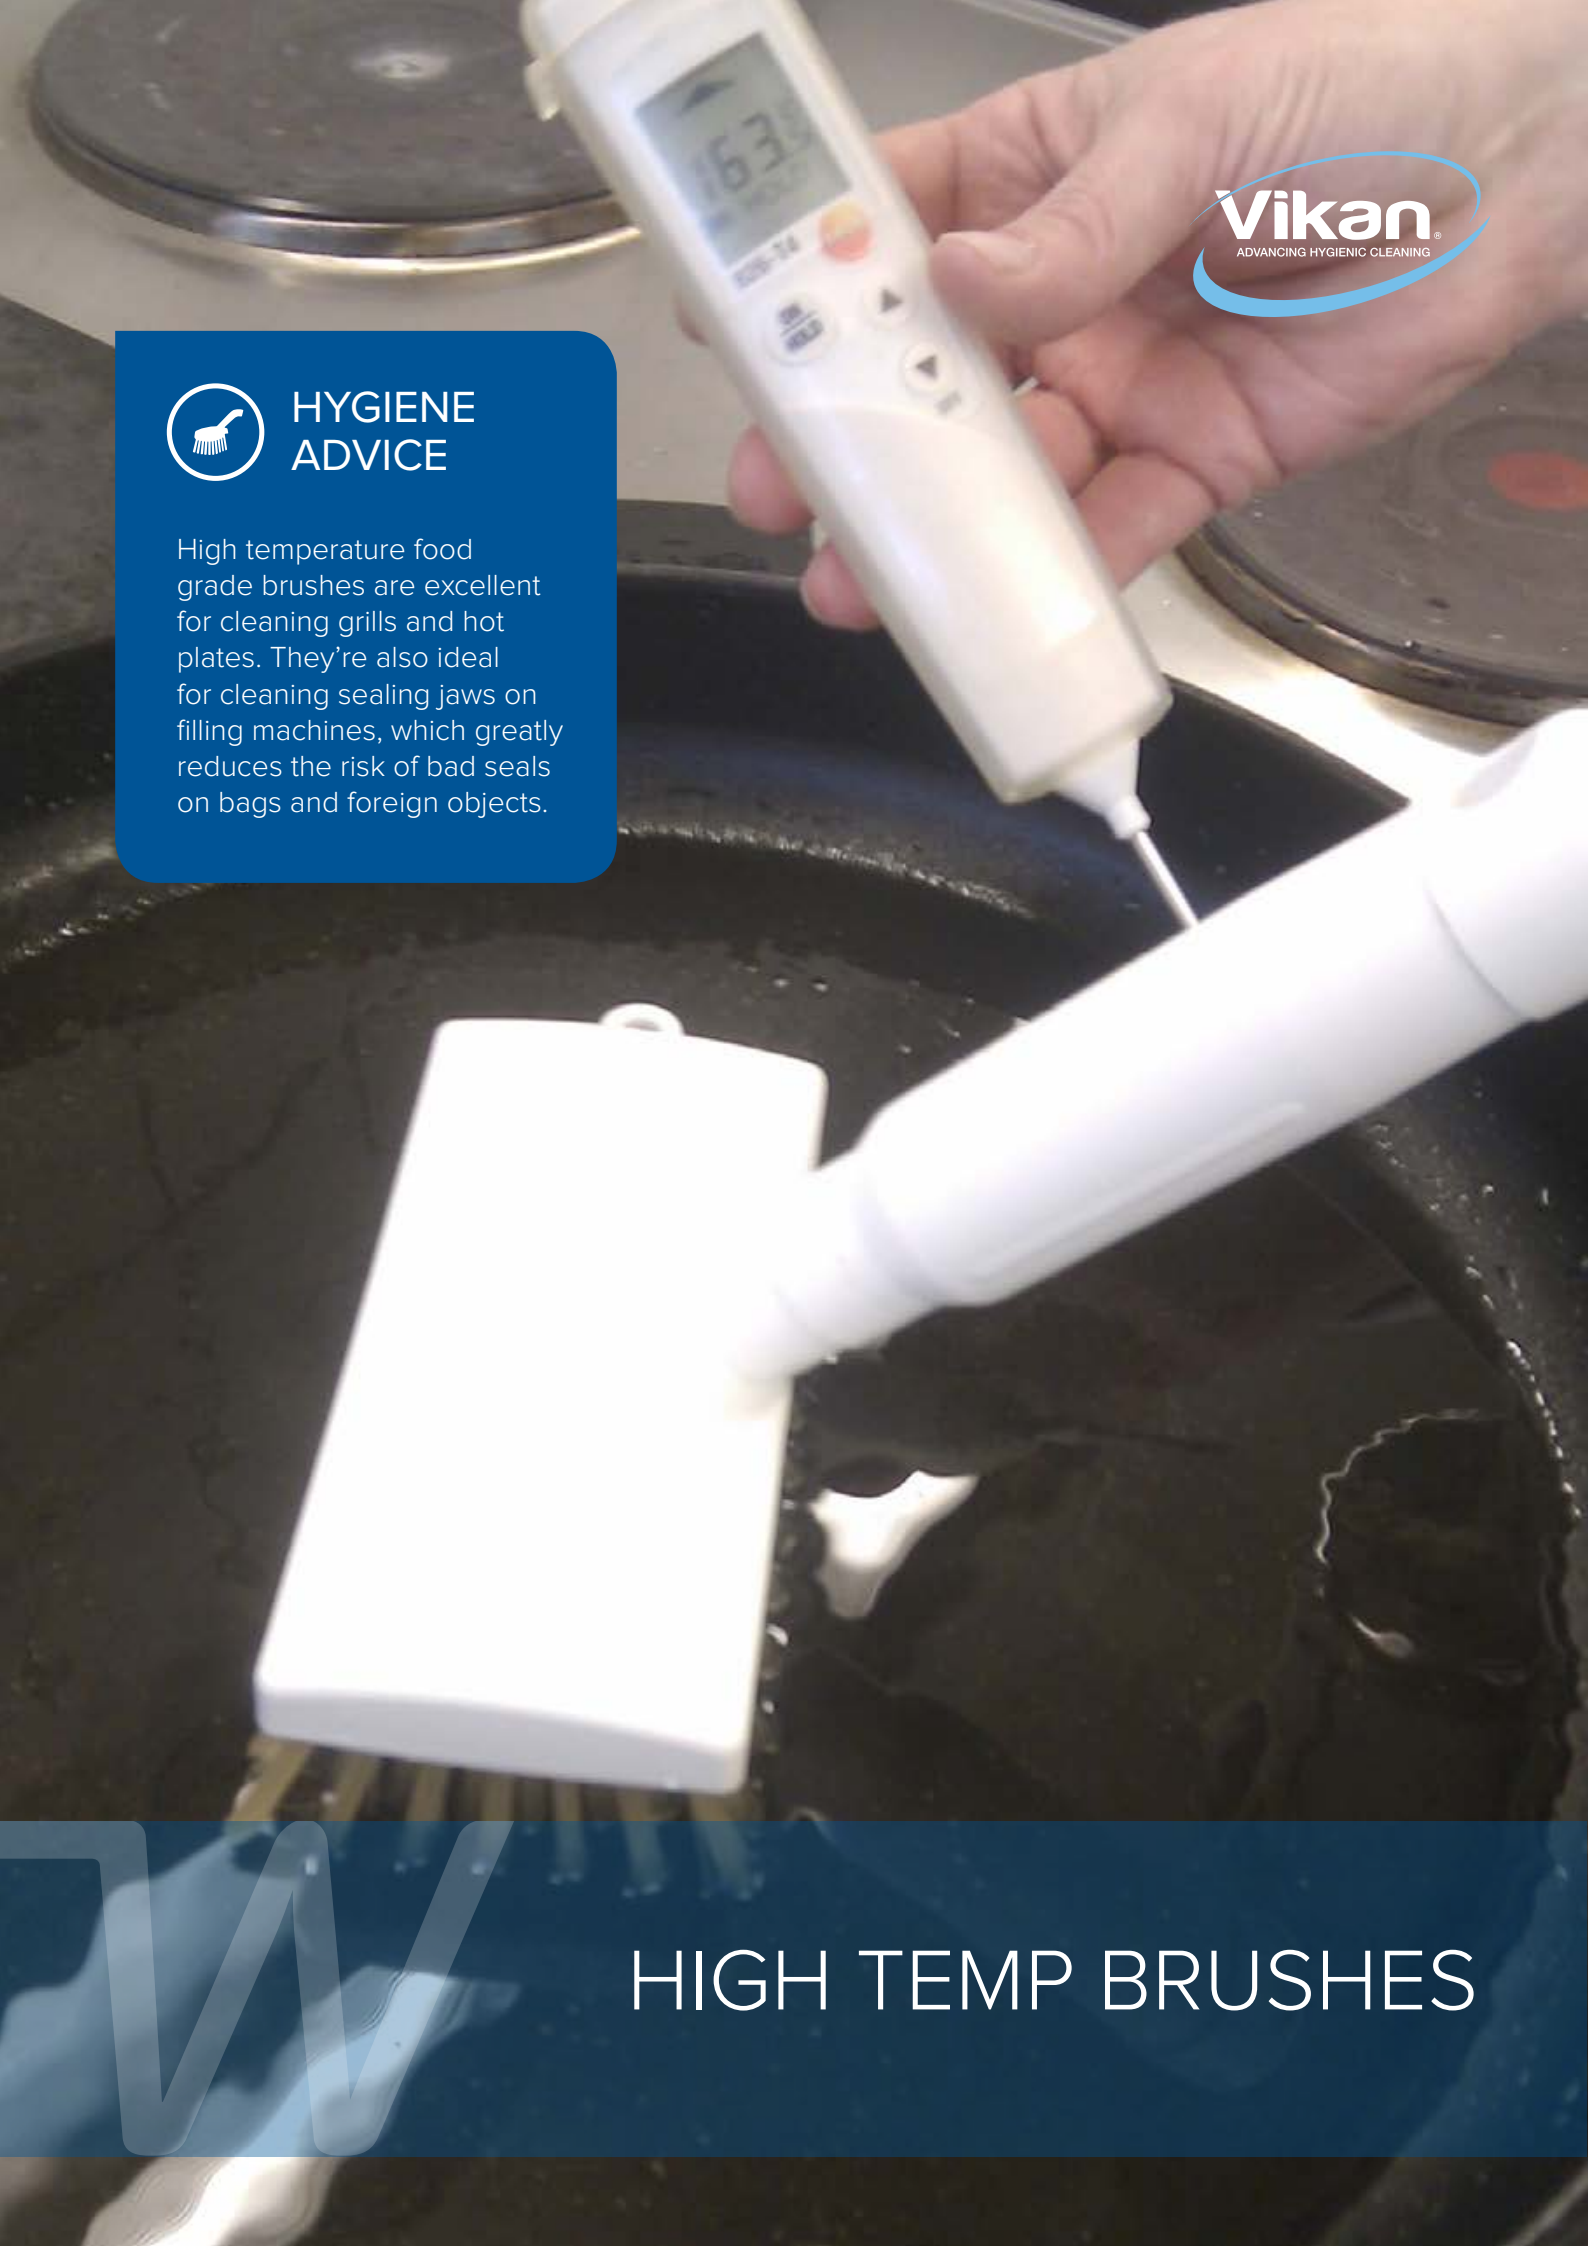
ADVANCING HYGIENIC CLEANING
Thise Mejeri



HYGIENE ADVICE

High temperature food grade brushes are excellent for cleaning grills and hot plates. They're also ideal for cleaning sealing jaws on filling machines, which greatly reduces the risk of bad seals on bags and foreign objects.

HIGH TEMP BRUSHES

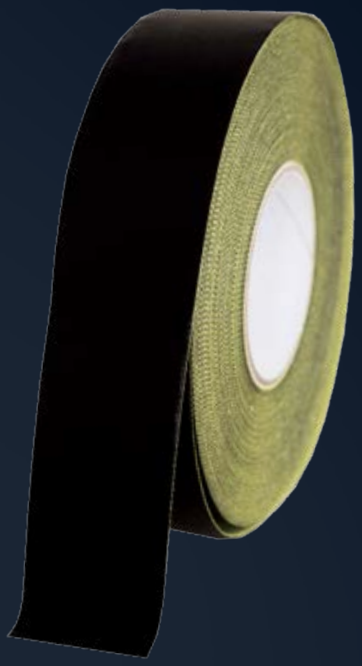
The ‘Perfect’ Heat Seal

Detectable Teflon Tape features a Teflon-glass fabric metal detectable tape with silicone adhesive to provide a non-stick surface to heat seal against, or a slippery cover for chutes that transport foods or pharmaceuticals. This provides protection against worn tape falling into a poly bag or package and going undetected, this Detectable High Temp Teflon Tape can be identified by a metal detector before leaving the manufacturer’s facility.*

Detectable High Temp Teflon Tape

Product Code:	57/MDHST
Dimensions:	30m x 75mm
Materials:	Silicone
Temperature:	-73 to +260 °C

For more quality detectable products refer to page 73



Enables any foreign heat sealing tape in product to be detected

Fine particles of metal embedded in the Teflon

Teflon coating provides non-stick surface to heat seal against

** Detectability of the tape may depend on calibration settings of the detector and the product being processed.*

TUBE & PIPE BRUSHES

Tube Brush Selection Guide

Bristle Type:	Diameter Ø	Pipe Length	Handle Type	External Pipeworks
Notes:	Measure the internal diameter of the pipework to be cleaned.	Work out the length of the pipe and then choose your brush accordingly.	Flexible rods are great for pipeworks with bends, whereas straight handles are ideal for larger diameter straight pipework.	Don't forget to clean the external tops and around pipework in your plant also, which are often overlooked.

The World's Best Bucket

The Vikan bucket is so full of functional benefits that it is the perfect choice for the food and beverage industry. The unique design not only makes it look different - it also delivers a combination of food safety and user-friendliness.

Durable bevelled measurements for accuracy.

Click on lid helps avoid foreign object contamination.

Heightened rim on lid allows for safe stacking of buckets.

Stainless steel handle fastened from inside to prevent catching on clothing.

Drip free spout allows for safe pouring.

Hygienic hand grip on rear of bucket.

Durable wear rim on base of bucket for long life.

Ultra Safe Technology: A Hygiene Revolution

ULTRA SAFE TECHNOLOGY (UST) is part of Vikan's ambition to create the most secure, safe and hygienic cleaning tools for the food and beverage industry.

Safest Filament Security System

- The new Filament Security Units are fully moulded as an integral part of the brush, effectively making it a one piece brush.
- The unique positioning of the filaments means the brushes clean brilliantly well.
- This feature minimises the risk of loose filaments, and thus, the potential for product rejection, recalls and waste.

Hygienic Design: Super Easy to Clean

- The unique brush head pattern makes the brush easy to clean and dry and improves cleaning efficiency.
- This reduces the risk of product rejection or recall due to contamination from microbes/bacteria, foreign bodies, cleaning chemicals and allergens.

Superior Technology: A Safer Choice

- Vikan UST brushware provides a far superior alternative! Why?
  - ✔ The unique UST technology minimises the risk for contaminants and bacteria to collect and grow.
  - ✔ UST brushes are easy to clean, sanitise and inspect, resin set brushes are not.
  - ✔ UST is fully compliant with EU food contact legislation.
  - ✔ UST brushes are fully colour coded, resin set brushes are not.

EQUIPMENT IDENTIFICATION & STORAGE SOLUTIONS

Wells offer an extensive range customisable equipment identification and storage solutions to ensure you meet and exceed Good Manufacturing Practice (GMP) and 5S principles.

Appropriate storage of hygiene and food handling tools is essential to meet hygiene, food safety and healthcare standards.

The solutions can be adapted to almost any environment and can be easily expanded to accommodate additional tools.

Vikan modular storage systems

Vikan's modular wall bracket system is fully expandable to suit your tool requirements. It is also available in 9 colours to suit your area colour coding requirements.

METAL & X-RAY DETECTABLE PRODUCTS

The BST Detectable Range has been specifically designed for the food processing and pharmaceutical industries. All products are high impact, food contact approved. The material has the ability to be detected and rejected by detection machines. Most products in the range are uniquely Metal and X-Ray detectable.

XDETECT® 2.0 Food grade detectable plastic

BST Teasdale were the first and remain the market leaders in detectable products for the food and pharmaceutical industries.

Their unique detectable plastic compounds make BST products highly detectable, shatter proof, antibacterial and safe, for all environments.

All products are made in Britain to strict standards to meet and exceed quality standards such as BRC, British Retail Consortium, among other quality standards.

Distributed exclusively in Australia and New Zealand by Wells and their network of authorised distributors. BST detectable products can be implemented in your facility in a timely and cost effective manner.

Electromagnetically Detectable

XDETECT® 2.0 can be detected and rejected by industry standard in-line metal detection systems. It will even stick to a magnet, and has the same excellent material performance as regular polypropylene plastic.

Silver Ion Antibacterial Protection

All of our XDETECT® 2.0 compound pens incorporate silver ion antibacterial technology. This technology is laboratory tested and proven to be effective against pathogenic germs and mould, including E Coli, MRSA and Salmonella.

X-Ray Visible

Unlike many other detectable plastics, XDETECT® 2.0 contains an extra additive specifically designed for enhanced X-ray visibility. Customer feedback and independent testing has shown that our compound is highly visible in x-ray inspection applications.

Need assistance? **call** 03 9699 8999 (AUS) // 09 263 9332 (NZ)

reduces the risk of foreign body contamination

The new formulation of XDETECT® 2.0 plastic is the most detectable, strong, and colourful compound ever made by BST.

Wells/BST XDETECT® 2.0 pens & products are extremely safe, and of the highest standard of safety and durability.

It is also our most extensively tested compound with food contact approvals including FDA approved ingredients and full migration testing against EU standards.

With added antibacterial technology, this plastic is the science behind the world famous DetectaPen Range.

CT® 2.0

New Formulation, More Colours

FDA & EU Food Contact Approval

XDETECT® 2.0 contains only FDA approved ingredients, and is fully compliant with the latest EU food contact regulations, including full migration testing against EU migration limits.

Bright Colours for Visual Detection & Colour Co-ordination

XDETECT® 2.0 is available in eight bold and vibrant colours, making the plastic easy to spot as a foreign body with the added bonus of fitting into your production area colour coding schemes and plans.

Shatter Resistant

The latest version of our compound is the toughest yet, designed not to shatter when exposed to harsh impacts, even in freezing conditions.

PRODUCT GUIDE

When placing an order please note the product code and colour option (if applicable) to ensure we fulfil your order correctly. The example below demonstrates how our coding system works. If you require more information about a product please speak with your sales consultant or call our office on 03 9699 8999 (Australia) or 09 263 9332 (New Zealand).

Just add colour...

Simply add your desired colour code to the product code to confirm the exact product required.

RETRACTABLE DETECTAMARK® RANGE

The Detecta-Mark Permanent Marker features Sureflow ink, meaning the pen will continue to write for several days, even if the cap is left off. This alcohol-based ink will permanently mark most surfaces, including wood, plastic, glass concrete and clean or printed metals.

All internal & external plastic compounds are:

- Metal Detectable
- X-Ray Visible
- Shatter Resistant
- Coloured Co-ordinated Caps
- FDA & EU Food Contact Approval
- Lanyard Compatible

This is totally unique to the DetectaMark range versus the competition.

DETECTABOX®

Using XDETECT®, BST's flagship metal detectable & x-ray visible plastic

The BST DetectaBox® is designed to address the problem of box fragments contaminating food products. This problem can occur whenever a food storage or handling box is subject to more wear and tear than usual and it is at risk of breaking or chipping.

The DetectaBox® is manufactured using XDETECT®, BST's flagship and industry renowned metal detectable and x-ray visible plastic. This plastic is designed entirely with food safety in mind. As well as being highly detectable it is also strong, hardwearing, brightly coloured, chemical resistant, shatter resistant, FDA approved and EU compliant.

SWAN 300

Detectable safety knife

The disposable Swan Safety Knife is an ideal bag/sack cutter. With it's pointed nose to puncture into material, 'opposing slopes' at the blade exit for a more efficient cut and tape cutter located at the side of the knife, this is an excellent general warehouse cutter. Moulded in a Metal Detectable plastic with Stainless Steel blade and tape cutter.

NEW DETEX™

Metal and X-Ray detectable trigger sprayer.

Adjustable spray nozzle to ensure proper application

Ergonomic, 3 finger trigger to reduce finger fatigue

Durable bottle construction and chemically resistant trigger

Metal detectable label to eliminate risk of undetected food contamination readily identifies it as non-food object.

Label area for convenient product identification

Blue colour for all metal and x-ray detectable plastic readily identifies it as non-food object.

DETEX™ - Spray Bottle

Product Code:	57/DETSB
Capacity:	828 mL

MXN

One more step in food safety

DETEX™ components are engineered from metal and x-ray detectable plastics to reduce the risk of foreign object contamination during food and beverage processing.

Fill empty DETEX™ trigger bottle with your food safe chemicals that meet your needs.

PPE & First Aid - Metal Detectable Equipment

Hairnet

5mm Close Mesh:	57/PED00HCHB+
Colour:	+3 +4 +5
Pack Size:	100

Beard Net

5mm Close Mesh:	57/PEC21HCBB
Colour:	Blue
Pack Size:	25

Mob Cap

Product Code:	57/DCAP+
Colour:	+3 +4 +5
Pack Size:	100

* Double elastic headbandfor added comfort & security

Non Woven Beard Snood

Product Code:	57/DBS
Colour:	Blue
Pack Size:	500

* Designed for easy breathing, comfort and safety.

5 EASY STEPS

To Correctly Wear Your Hairnets & Beard Snoods

1. Hold the Beard Snood with the closures east to west, holding the elastic in one hand and the body of the Beard Snood in the other. Locate the elastic to the back of the head and make sure the Beard Snood covers the nose.

2. Locate under the chin and ensure the elastic is over the ears. The Hairnet should not be put on first as the Beard Snood closures are covered by the Hairnet. This provides extra security and ensures the Beard Snood is kept in place.

3. Before donning the Hairnet, brush and tie the hair back. Make sure it's not tied too low down, as the Hairnet elastic needs to lay flat against the neckline.

4. With the closure north to south hold the Hairnet open ready for donning. Wearing it this way pulls the meshes closer together. Locate across the forehead and pull the Hairnet over the crown, ensuring all hair in the nape of the neck is covered. Locate under the ears, to keep the Hairnet securely in place.

5. Check all hair is fully enclosed, that the double elastic headband is laying flat and is located under the ears. If necessary get a colleague to double check. Put on other PPE after the Hairnet has been donned. This ensures that any hair dislodged by adjusting, isn't taken into the workplace.

Detectable Overshoes Cover

Product Code:	57/PE31101M
Colour:	Blue
Pack Size:	2000

M

* 40cm handmade with continuous elastic loop.

Detectable Oversleeves

Product Code:	57/PE31102M
Colour:	Blue
Pack Size:	2000

M

* Handmade with elastic opening at wrist and elbow, to avoid tearing.

Detectable Vinyl Gloves

Small:	57/DVG100S
Medium:	57/DVG100M
Large:	57/DVG100L
XLarge:	57/DVG100XL
Colour:	Blue
Pack Size:	100

M

* Non-powdered vinyl gloves

Size:	Various
Pack Size:	95

Catering First Aid Kit

Our first aid kit is suitable for the catering industry, food preparation & production areas, or any workplace. The kit meets standard BS-8599-1 and incorporates both a first-aid and burns kit in one. Featuring bright blue metal detectable plasters, and bright blue visually detectable nitrile gloves.

Small (as shown):

1 x Guidance Leaflet
1 x Contents List
4 x Medium Sterile Dressing
1 x Large Sterile Dressing
2 x Triangular Bandage
6 x Safey Pins
2 x Sterile Eyepad
40 x Detectable Plasters
20 x Sterile Saline Wipes
1 x Microporous Tape
6 x Blue Nitrile Gloves (pairs)
2 x Detectable Finger Dressing
1 x Resuscitation Face Shield
1 x Foil Blanket
1 x Hydrogel Burn Dressing
1 x Scissors
1 x Conforming Bandage

Medium:

1 x Guidance Leaflet
1 x Contents List
6 x Medium Sterile Dressing
2 x Large Sterile Dressing
3 x Triangular Bandage
12 x Safey Pins
3 x Sterile Eyepad
60 x Detectable Plasters
30 x Sterile Saline Wipes
1 x Microporous Tape
9 x Blue Nitrile Gloves (pairs)
3 x Detectable Finger Dressing
1 x Resuscitation Face Shield
2 x Foil Blanket
2 x Hydrogel Burn Dressing
1 x Scissors
2 x Conforming Bandage

Small (as shown):	57/DCFAKS
Medium:	57/DCFAKM
Pack Size:	1

* Features detectable plasters in hard re-useable plastic case

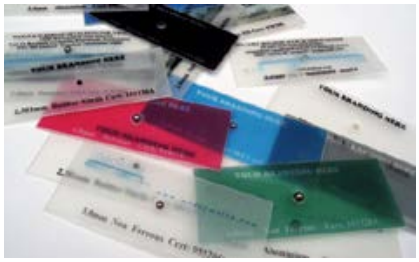
Detectable X-Ray Cards & Test Wands

Wells can supply your facility with an extensive range of Test Pieces and Test Cards to assist with verification of basic Metal Detectors, through to the most advanced X-Ray technology.
All test pieces, cards and wands come with full certification to meet stringent QA standards.

Our Single point X-Ray cards are available in a number of sizes & materials.



Xray Testing - Single Point Cards 1 Ball

Contaminant	Code
Aluminium:	57/XR ALUM (SIZE)
Ceramic:	57/XR CER (SIZE)
Rubber:	57/XR RUBBER (SIZE)
Soda Lime Glass:	57/XR SLG (SIZE)
SS 316:	57/XR SS316 (SIZE)
Teflon:	57/XR TEFLON (SIZE)

M X

Ball size: *Various sizes, ranging from 1.0 - 8.0mm*
Card dimension: *95mm x 35mm*

Our Multipoint X-Ray cards are available in a number of test ball sizes and test material types.

Xray Testing - Multi Point Cards 6 Ball

Notes

BioFinder

BIOFILM DETECTION MADE EASY

- Efficient detection of biofilms caused by bacteria, including *Listeria, Salmonella, E.coli & Staphylococcus.*
- Safe to use, non-staining, no residue & easy rinsing.
- Very competitive versus other detection methods.
- Significantly strengthens your validation process.

BIOFILM DETECTION

The presence of biofilms on food preparation surfaces within processing operations is a significant cause of contamination.

Biofilms are invisible to the naked eye, but they can be detected. BioFinder is an innovative solution for the detection of biofilms in open surfaces and an effective tool for hygiene monitoring.

Once detected, biofilms can be broken down on external surfaces with an effective enzymatic treatment, incorporated into regular cleaning regimes.

BioFinder

AN INNOVATION IN BIOFILM DETECTION

BioFinder

Biofinder reacts specifically in the presence of biofilms.

You can immediately spot any contaminated areas by a simple visual inspection just after spraying BioFinder on the facilities surfaces.

Stainless steel surface moistened with water.

Negative reaction after using BioFinder on a non contaminated surface.

Positive reaction after using BioFinder on a surface contaminated with biofilms.

Side view of a positive reaction after using BioFinder on a surface contaminated with biofilms.

Ensure your food surfaces are free from contamination.

To learn more about BioFinder speak with your friendly sales team on 03 9699 8999 (AUS) or 09 263 9332 (NZ)

BioFinder 1 x 500ml Bottle

Product Code: 43/1311BF1

BioFinder 3 x 500ml Bottles

Product Code: 43/1311BF3

ENZYMATIC TREATMENT FOR OPEN SURFACES

Advantages of our products

- Neutral pH
- Non corrosive effects on the materials of the surfaces
- Low risk of exposure for the staff
- Easily biodegradable composition, environmentally friendly
- Effective removal of biofilms
- Prevents the recurrence and spread of biofilms
- Help in preventing costly contamination
- Enhanced cleaning efficiency
- Enzymes activate water purification processes thanks to their continuous action at a later stage

BioJet

Concentrated blend of enzymes specially designed for the removal of biofilms in the facilities of food, pharmaceutical and chemical industries, in the health sector, and in the hospitality industry.

BIO JET is used together with ENZY JET / ENZY JET PLUS. The combination of these products effectively contributes to the removal of biofilms.

This is a highly concentrated product which offers great efficiency in low doses, thus becoming a cost-effective antibiofilm treatment.

Bio Jet Ultra Concentrate Enzyme Blend 1 Lt

Product Code: 43/BFBJ1

EnzyJet PLUS

Enzymatic detergent specially designed for the control and removal of biofilms.

Its foaming single-component formulation makes it possible for this product to be used on open surfaces by means of foaming cleaning equipment.

It is an effective product which facilitates the removal of biofilms. It can be used on its own, or with BIO JET, in accordance with the type of treatment.

Enzy Jet Foaming Enzymatic Detergent 5 Lt

Product Code: 43/BFEJ5

* All Biofilm hygiene products come with complete HSDS and appropriate approvals to comply with stringent HDCCP requirements.

HYGIENE ADVICE

Floor drains in food processing facilities can be notorious for harbouring bacteria and soil.

Regular cleaning of drains will ensure a safer and more hygienic facility

See Vikan page 19.

LOOKING FOR A DRAIN REMOVAL HOOK

See page 19 for the full details on our exclusive Stainless Steel floor drain removal hook.

DID YOU KNOW....

Vikan pad holders utilise a unique stainless steel pad locking system so your scourers never come off.

This greatly reduces risk of the scourer pad becoming a foreign object.

VIKAN PROFESSIONAL MICROFIBRE SYSTEM

Vikan's Professional Microfibre Cleaning System combines the superior cleaning performance of microfibre with ergonomically designed equipment, promoting correct working posture that helps reduce the potential for workplace injuries.

SELECTION GUIDE

Get the right mop for your application.

Guaranteed to perform at its very best for more than 500 uses and washes.

VIKAN FACT

The high content of Vikan 'ultra microfibre' ensures large quantities of dust and dirt particles can be removed from the mop with extremely low friction, making it very easy to use.

	Dry Mop	Damp Mop	Wet Mop	Specialty Mop
Suitability	Dirt and dust	Stubborn dirt, sand, gravel and bacteria	Stubborn dirt, sand, gravel, spills and stains	Stubborn dirt, sand, gravel, grease, stains and fine dirt
Surface Type	Hard and flat floors	Hard and flat floors	Hard and flat floors (excluding wooden floors)	Windows, mirrors, tables, boards and other hard surfaces

Dry 21 Mop

Premium Microfibre attracts dust dirt and hair. Best on hard flat floors.

25cm Velcro	17/E547225
*40cm Pocket	17/E547200
40cm Velcro	17/E547240
60cm Velcro	17/E547260

Dry 24 Mop

Excellent dry sweeping mop for all types of hard flat floors.

40cm Velcro	17/E547140
60cm Velcro	17/E547160

COLOUR CODED TAGS

Selected Vikan mops are available with colour coded tags to help you manage your cross contamination program.

** **NOTE** All pocket style mops have been designed to fit Vikan Folding Mop Frame code 17/E374018 (see page 148)*

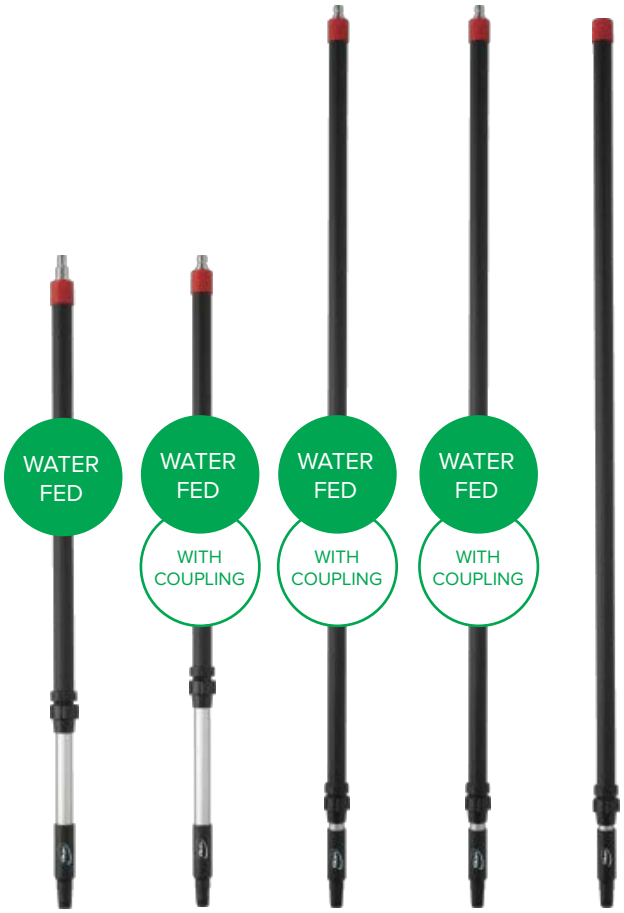
Ergonomic Handle - Telescopic



All handles: Ø 32mm

Product Code:	28/T297152	28/T297152Q	28/T297352	28/T297352Q	28/T297552
Dimensions:	1080-1600mm	1060-1600mm	1615-2840mm	1600-2840mm	1575-2800mm
Materials:	PP, AL	PP, AL	PP, AL	PP, AL	PP, AL

Wash Down Hose Reel

Product Code:	55/RC11005
Hose Length:	15m x ½" Ø

** Comes with handle & wall mount bracket and 28/00701 female coupling.*

Trigger Operated Water Gun

Product Code:	28/93249
Dimensions:	170 x 145 x 55mm
Temperature:	95 °C / 25 bar

** Requires male coupler 28/00712 see below.*

Hose Couplings & Adaptors

	Male Coupling ½" for ½" Hose	Male Coupling ¾" for ¾" Hose	Male to Male Coupling ½"	Tap Coupling, Male with Reducer ½"	Gardena Adapter with Thread ½"
Product Code:	28/00712	28/00715	28/00705	28/00700	28/T707052
Materials:	CPB	CPB	CPB	CPB	CPB
Temperature:	80 °C / 25 bar	80 °C / 25 bar	80 °C / 25 bar	80 °C / 25 bar	80 °C / 25 bar

Modular storage solutions.

Vikan's modular wall bracket system is fully expandable to suit your tool and workshop requirements. It is also robust and long lasting to meet the demands of your workshop or wash bay.

Vikan Wall Bracket System

	Wall Bracket 1-3 Products	Wall Bracket 4-6 Products	Wall Bracket 3 Products
Product Code:	28/10179	28/10189	28/006159
Dimensions:	60 x 160 x 80mm	60 x 395 x 80mm	60 x 240 x 170mm
Materials:	PP, RB	PP, RB	PP

Want more options?

Toolflex's tool holder system is extremely versatile and is available in range of sizes and can be equipped with a wide range of tool holders and hooks.

Toolflex Original Bracket System

	Tool Holder Pack (2x)	Tool Hook Pack (2x)	Wall Bracket 3 Products	Wall Bracket 5 Products
Product Code:	28/TF0512-1	28/TF0587-1	28/TF0555-1	28/TF0556-1
Inclusions:	2 x 20-30mm holders	2 x hooks	500mm rail 20 – 30mm holders x 2 30 – 40mm holders x 1	900mm rail 20 – 30mm holders x 3 30 – 40mm holders x 2
Materials:	PP, RB	PP	PP, RB, AL	PP, RB, AL
