

Product Data Sheet

BW-580 Series Hand Dipping Wax

Description

This wine bottle sealing wax accomplishes a distinct look on the bottle, provides a positive seal, and is an environmentally conscious product with good economics. Blended Waxes' Hand Dipping Wax is formulated to allow for an even layer of wax when dipping bottles. The wax is easy to peel off the bottle at room temperature as well as chilled wine serving conditions. Available in block or stick form in the following colors:

- ◆ BW-580 Beige
- ◆ BW-581 Honey
- ◆ BW-582 Mustard
- ◆ BW-583 Burgundy
- ◆ BW-584 Purple

- ◆ BW-676 Magenta
- ◆ BW-715 Fuchsia
- ◆ BW-716 Lime Green
- ◆ BW-717 Tangerine
- ◆ BW-718 Aqua
- ◆ BW-719 Goldenrod

Information on custom colors and other formats available upon request.

Applications

Hand Dipping Wine Bottle Sealing Wax is typically applied by dipping the bottle top into a pot of melted wax. One pound of wax will seal approximately 25 – 30 bottles.

The wax should be heated to about 275 °F - 300 °F.

BW-580 Series Hand Dipping Wax Properties		
Test Description	Typical	Range
Congealing Point (D-938)	170° F 77° C	161° - 179° F 72° - 82° C
Needle Penetration (D-1321)		
0.1mm @ 77° F/25° C	3	2 - 4
0.1mm @ 100° F/38° C	7	4 - 10

FDA Status: This product is in compliance with Federal Regulations 21CFR- 172.886 and 21CFR-178.3710.
